

## LIQUEFIED PETROLEUM GAS TRANSLOADER

**APPLICABLE PRODUCTS:** Butane, Propane and HVP Products.

**MORE INFO?**  
[squad@pflpetroleum.com](mailto:squad@pflpetroleum.com)

### THE DETAILS

PFL's safe and code-compliant propane and butane transloaders are efficient, reliable and ensure quick offloading times from rail to truck or truck to rail. These units utilize a high-capacity Corken compressor. For butane in colder climates, we incorporate an optional liquid line pump system. All designs include a hydraulic ramp gantry system for maximum safety in accessing the top of railcars. Additional optional safety features include fire and gas detection and high-powered LED lighting.

Propane and butane HVP transloaders are available in fixed and mobile configurations and feature a safe and effective flow-through design for offloading times and flowrates up to 1500LPM/400 GPM.

### DELIVERABLES + TECHNICAL SPECS

- Corken compact compressor package
- Automated compressor and process shutdowns via PLC
- Audio and visual alarm indication
- Package isolation via five automated ESD valves
- Automated truck grounding system
- Overpressure protection for piping and components
- Standard compressor safety equipment
- Wireless shutdown remote (base controller)
- Engineered and certified package
- Safe, effective flow-through design for efficient offloading times
- Flow rates up to 1500LPM/ 400GPM
- Meets and exceeds Canadian Safety Standards
- Top access gantry with gangway can be fixed or portable
