| Market Commentary |
|--|
| Oil prices were mostly flat for the day, after initially trading lower |
| earlier on in the session but trading back up later in the day. The |
| Saudi energy minister hinted towards an OPEC+ production cut, |
| possibly if the Iran deal were to add production back to market. |
| Rate hikes and a slowing global economy are still a headwind for |
| the market and a 50 bps hike is expected in September. "The near- |
| term fundamentals seem more to the bears until we see some |
| positive economic indications either out of the U.S. or China, which |
| is looking unlikely," said Dennis Kissler, senior vice president of |
| trading at BOK Financial. WTI traded down \$.54 or .6% to close at |
| \$90.23. Brent traded down \$.24 or25% to close at \$96.48. |
