	Market Commentary
1	Oil prices rallied today, up 2% in volatile trade. Positive economic data
	from China and the US was received well by markets after strong job
	growth in the US. China, the world's top crude importer, brought in
	8.79MM/bpd of crude in July, up from a four-year low in June, but still
	9.5% less than a year earlier, customs data showed. "Once again the
	macro influences have seeped back into this market especially as it
	relates to Friday's employment number the economics of that should
	be giving us much better gasoline demand than we're seeing," said
	John Kilduff, partner at Again Capital LLC in New York. Analysts at
	Goldman Sachs said they believe the case for higher oil prices remains
	strong, with the market in a larger deficit than they expected in recent
	months. WTI traded up \$1.75 or 1.97% to close at \$90.76. Brent
	traded up \$1.75 or 1.73% to close at \$96.65.
